

# Business Requirement Document (BRD) E-Commerce Profit & Sales Analysis Dashboard

---

## 1. Purpose

The purpose of this Business Requirement Document (BRD) is to define the requirements, objectives, scope, and reporting functionalities for the E-Commerce Profit & Sales Analysis Dashboard. The dashboard is intended to provide business stakeholders with insights into sales, profitability, discounts, shipping costs, and payment method performance.

## 2. Business Objectives

- Monitor sales and profit performance across the business.
- Analyze customer payment preferences and revenue contribution.
- Evaluate shipping costs and profit margins.
- Understand the impact of discounts on profitability.
- Enable data-driven decision-making using interactive dashboards.

## 3. Business Problem Statement

The organization currently lacks a centralized reporting system for analyzing e-commerce sales and profit performance. Manual reporting methods are inefficient, time-consuming, and do not provide real-time insights required for strategic decision-making.

## 4. Project Scope

### In Scope:

- Sales analysis
- Profit analysis
- Shipping cost analysis
- Payment method analysis
- Discount percentage analysis
- Monthly sales trend analysis
- Interactive filters and KPI monitoring

### Out of Scope:

- Inventory forecasting
- Customer churn prediction
- Supplier analytics
- AI-based forecasting models

## 5. Dashboard Functional Requirements

### Dashboard Page 1 – Sales Analysis

#### KPIs:

- Total Profit
- Total Sales
- Average Unit Price

#### Visual Components:

- Monthly Sales Trend Chart
- Unit Price vs Total Sales Scatter Plot
- Sales by Payment Method Bar Chart

- Discount Distribution Pie Chart

**Interactive Filters:**

- Date Filter
- Payment Method Filter
- Unit Price Range Slider

**Dashboard Page 2 – Profit & Shipping Analysis****KPIs:**

- Average Shipping Cost
- Profit Margin
- Total Shipping Cost
- Total Profit

**Visual Components:**

- Discount Percentage vs Profit Scatter Plot
- Profit by Payment Method Chart
- Total Sales and Profit Correlation Chart
- Shipping Cost by Payment Method Chart

**Interactive Filters:**

- Discount Percentage Slider
- Payment Method Filter
- Profit Range Slider

**6. Stakeholders**

- Business Management Team
- Sales Department
- Finance Department
- Data Analysts
- BI Developers

**7. Data Requirements**

The dashboard will utilize transactional e-commerce data including:

- Order ID
- Order Date
- Payment Method
- Unit Price
- Total Sales
- Discount Percentage
- Shipping Cost
- Profit
- Profit Margin

**8. Business Rules**

- Profit Margin = Profit ÷ Total Sales
- Discounts must be stored as percentage values.
- KPI cards should update dynamically based on selected filters.
- Only completed transactions should be included in sales calculations.

**9. Non-Functional Requirements**

- Dashboard loading time should be less than 5 seconds.
- Secure access must be provided for authorized users only.

- The dashboard should support future data scalability.
- Reports must display accurate and validated data.

## **10. Risks and Constraints**

### **Risks:**

- Incomplete or inaccurate source data
- Delays in data refresh
- Performance issues with large datasets

### **Constraints:**

- Dashboard performance depends on source data quality.
- Historical data availability may be limited.

## **11. Expected Benefits**

- Improved business visibility
- Faster reporting and analysis
- Better understanding of profit trends
- Enhanced monitoring of sales performance
- Improved strategic decision-making

## **12. Success Criteria**

The project will be considered successful if:

- Dashboard reflects accurate business metrics.
- Users can analyze sales and profit efficiently.
- Dashboard performance meets stakeholder expectations.
- Stakeholders can make informed business decisions.

## **13. Conclusion**

The E-Commerce Profit & Sales Analysis Dashboard will provide a centralized reporting and analytics platform for monitoring business performance. The dashboard will improve operational efficiency, enhance visibility into profitability and sales trends, and support strategic planning through data-driven insights.
